situation: A new store in a rapidly growing Melbourne suburb required an acoustically harmonious customer experience with a strong brand presence. **solution:** Au.diTile reduces reverberation above fresh food with a warm timber finish that complements the produce. Ceilings remain easily accessible for ongoing maintenance. Working closely with the project architect, Atkar designed and constructed Au.diPanel baffles in IGA's vibrant colour scheme to achieve a visually dynamic result that effectively reduces ambient noise levels in this bustling environment.
