situation: A new state-of-art facility for the Australian Defence Force. **solution:** The architects designed the buildings with maximum acoustic performance in mind specifying Atkar's wall and ceiling panel solutions for a visually integrated design result. The officers' mess features hoop pine plywood Au.diSlot panels which add warmth whilst accentuating the unusual length of the space. For the theatre, Au.diSlot panels with an Au.dilimage Rock Maple finish were fitted to ceilings and walls – custom slotted to follow the stair line. Atkar's Au.diMount concealed fixing systems ensured efficient installation and future flexibility. Inside the learning centre, Atkar installed an Au.diTile Meteor ceiling solution together with an Au.diFrame anodised aluminium grid.
