

Au.diSlat™ data sheet

Product Description

A distinctive 3 dimensional effect is created by the individual members of the Au.diSlat panel. Separate pre-finished wood slats are mounted in a modular panel array which, as an option, can be treated acoustically with our Integrated Acoustic Fabric (IAF). Recessed fastening points are provided allowing the panel to be screw fixed to a conventional furring channel or T-bar system, and when installed, a linear effect is created.

Installation System

Integral Fastening Points for Screw Mounting

Product Features & Variations

- Extensive range of wood veneer, solid wood, decorative laminate, and paint finishes available.
- Standard IAF is black. Also available in white, a variety of custom colours, or no IAF for open ceiling designs or ventilation.
- Standard module width of 305mm (12")
- Standard panel lengths of 2413mm (95") and 3023mm (119"). Custom panel lengths up to 3632mm (143"), sold in 305mm (12") increments.
- Panels are designed to maintain 25mm (1") expansion joints between panels.
- Integral recessed fastening points are located to line up with common T-bar and furring centres.
- Standard selection of Grille and Linear slat configurations. Custom designs available through design coordination with Atkar Technical Staff.

York University New Student Centre—Au.diSlat Grille

Slat Orientations

– Au.diSlat Linear: **AX(insert code)L** is constructed with slats attached on the flat side to the supporting structure.

– Au.diSlat Grille: **AX(insert code)G** is constructed with slats attached on the edge to the supporting structure.

Huntingdale Golf Club—Au.diSlat Linear

Sustainability

Refer to Atkar Environmental Data Sheet. Consult Atkar Technical Staff to determine which LEED credits will be available for specific projects.

Fire Rating

Standard Au.diSlat components meet or exceed Class C fire rating. If Class A fire rating is required, all components of the panel will conform to CAN/ULC test standards.

- Composite Cores: CAN/ULC-S102 Class A
- Solid Wood: CAN/ULC-S102 Class A
- Backers/Dowels: CAN/ULC-S102 Class A
- Standard IAF: CAN/ULC-S102 Class A

Au.diSlat™ Grille data sheet

Product Description

This versatile product has the most flexibility for various design options, with slat depth being fully customizable.

Installation System

Integral Fastening Points for Screw Mounting

Product Features & Variations

- Standard 19mm (3/4") slat width.
- Also available with 25mm (1") slats width.
- Optional decorative wood dowels.

Acoustics

Because the open area of Au.diSlat™ Grille panels is typically >50% (except for AX8), they are considered acoustically transparent, so the acoustic value of the panel will be similar to the acoustic value of the insulation installed behind it. Acoustic duct liner blankets or boards, can be purchased through Atkar or a local vendor. Typical NRC values for fibreglass duct liner insulation are:

- 0.5": 0.50 NRC
- 1.0": 0.70 NRC
- 1.5": 0.80 NRC
- 2.0": 0.95 NRC

How to Specify

- Slats per Panel
 - 2 x number of slats
 - E.g. 6 slats = 12
- Slat Configuration
 - G = standard Grille panel
 - GD = Grille panel with optional decorative dowels
- Slat Width
 - A = 19mm (0.75") nominal slat width
 - B = 25mm (1") nominal slat width—required for panels with optional decorative dowels (code: GD)
- Slat Depth
 - Slat depth in mm, 3 digits
 - e.g. 76mm (3") = 076; 102mm (4") = 102

Due to continual product improvement, the information in this publication is subject to alteration without notice.

33.3%	38mm (1.5")	8	AX16G	X	X					

*Can also include a decorative wood dowel (code: AX_GD instead of AX_G)

Au.diSlat™ Linear data sheet

Product Description

This popular product provides a simple, modular solution for simple but attractive linear wood ceilings.

Installation System

Integral Fastening Points for Screw Mounting

Product Features & Variations

- Standard 19mm (0.75") slat spacing.
- Optional 25mm (1") slat spacing available.

How to Specify

- Slat per Panel
 - 2 x number of slats (2, 3, or 4 slats)
- Slat Configuration
 - L = standard Linear panel
- Slat Spacing
 - A = 19mm (0.75") space between slats
 - B = 25mm (1") space between slats
- Slat Width
 - Slat Width in mm, 3 digits
 - e.g. 83mm (3.25") = 083
 - e.g. 127mm (5") = 127

Acoustics

In order to approve sound absorption capabilities, your Au.diSlat™ Linear panels can be specified along with acoustic insulation. Acoustic duct liner blankets or boards, can be purchased through Atkar or a local vendor. Some NRC values are provided below as a guide; however, there are many more factors contributing to the NRC value of a product, that must be considered on a per project basis.

- Type 'A' mounting, no insulation
 - Negligible
- E400, no insulation
 - ~0.20 NRC
- E400 or Type 'A' mounting, 1.5" fibreglass duct liner
 - <18% Open Area: ~0.45 NRC
 - 18%-30% Open Area: ~0.65 NRC
 - >30% Open Area: ~0.75 NRC

Due to continual product improvement, the information in this publication is subject to alteration without notice.

Au.diSlat™ Linear data sheet

Slat Spacing A: 19mm (0.75") Between Slats				
Code	No. of Slats	Slat Centres	Slat Width	Open Area
AX4L/A133	2	152mm (6")	133mm (5.25")	12.5%
AX6L/A083	3	102mm (4")	83mm (3.25")	18.8%
AX8L/A057	4	76mm (3")	57mm (2.25")	25.0%

Slat Spacing B: 25mm (1") Between Slats				
Code	No. of Slats	Slat Centres	Slat Width	Open Area
AX4L/B127	2	152mm (6")	127mm (5.00")	16.7%
AX6L/B076	3	102mm (4")	76mm (3.00")	25.0%
AX8L/B051	4	76mm (3")	51mm (2.00")	33.3%

Au.diSlat™ Custom data sheet

Product Description

The Atkar team is here to help make your design dreams a reality! Book an appointment with Atkar Technical Staff, who will walk you through every step of the design and specification writing.

Au.diSlat Custom opens up a whole realm of possibilities:

- Custom slat sizes
- Custom slat spacing
- Custom slat shapes
- Custom panel sizes
- Custom panel shapes
- Lay-in panels (T-bar applications)
- Flexible/curved panels
- Continuous linear slats
- Large baffle systems
- Custom acoustic fabric backing
